

Partner: Yealink
Models: MCore Mini-PC
Device Type: Video Conferencing

GENERAL INFORMATION

| | |
|------------------------------------|--|
| SIMPLWINDOWS NAME: | Yealink Room System MCore v1.1 |
| CATEGORY: | Video Conferencing |
| VERSION: | 1.1 |
| SUMMARY: | This module controls IP communication with the Yealink MCore Mini-PC. |
| GENERAL NOTES: | This module acts as the primary communication interface to a Yealink MCore Mini-PC and the devices connected to it. If multiple MCores are required, one MCore module for each MCore can be added to the solution. |
| CRESTRON HARDWARE REQUIRED: | 3-Series processor or 4-Series processor |

As of date of release, SSL certificate verification must be disabled on the Crestron processor.

3-Series:

The screenshot shows the 'SSL Management - auto 192.168.193.111' dialog. Under 'SSL Settings', Secure CIP Port is set to 41796, Secure CTP Port is 443, Secure Web Port is 443, Secure Gateway Mode is Default, and Min. TLS Version is 1.2. Under 'SSL Certificate Verification', the 'None' radio button is selected. Under 'SSL Online Certificate Status', OCSP is set to Disabled. Under 'Certificate Settings', the 'Self-Signed' radio button is selected, and there are fields for Password and Re-enter Password.

4-Series:

The screenshot shows the 'SSL Management - auto 192.168.193.131' dialog. Under 'SSL Settings', Secure CIP Port is 41796, Secure CTP Port is 443, Secure Web Port is 443, Secure Gateway Mode is Default, and Min. TLS Version is 1.2. Under 'SSL Certificate Verification', the 'Check Trusted Signer' checkbox is checked, while others like CA Certificate and Check Hostname are unchecked. Under 'SSL Online Certificate Status', OCSP is set to Disabled. Under 'Certificate Settings', the 'Self-Signed' radio button is selected, and there are fields for Password and Re-enter Password.

SETUP OF CRESTRON HARDWARE:

| | |
|-------------------------|--|
| VENDOR FIRMWARE: | Yealink RoomConnect 2.33.0.0 |
| VENDOR SETUP: | <p>Central Control must be enabled in the RoomConnect software running on the MCore. Login to the admin account of the MCore and open the Room Connect Software. Click the gear icon on the right of the top bar. Select General Settings on the Setting popup menu. Click on Central Control. On the Central Control screen, enable Central Control and HTTPS API. Enter an auth password. This is the password that will be used in the password parameter of this module. Click Save.</p> |

Certified Module

Partner: Yealink
Models: MCore Mini-PC
Device Type: Video Conferencing

PARAMETERS:

| | |
|-----------------------------|---|
| Command Processor Id | Integer value of the command processor instance for the AVHub and Camera modules to reference. |
| IPAddress | The IPAddress of the MCore. |
| Password | The password set in the Central Control section of the RoomConnect software. See vendor setup note above. |

Certified Module

Partner: Yealink
Models: MCORE Mini-PC
Device Type: Video Conferencing

CONTROL:

| | |
|------------|---|
| Connect | D Establishes communication with the system. Starts the initialization of the module. |
| Disconnect | D Stops communication with the system when the connection type parameter is set to IP. |
| Debug | D Set high to enable debug mode in the module. While enabled, verbose debug and error code output will be printed to the control processor console. |

Certified Module

Partner: Yealink
Models: MCore Mini-PC
Device Type: Video Conferencing

FEEDBACK:

| | | |
|------------------|---|---|
| Is Communicating | D | Indicates the module is communicating with the MCore when the signal is high. |
| Is Initialized | D | Indicates the module has received state with all component modules when the signal is high. |
